

Rules and Regulations

The Board of Trustees invites family and friends of the deceased to visit the gravesites of their loved ones. During visits, we ask that you abide by the following rules and regulations. It is our intention to provide a safe and secure setting for visitors. If you have any concerns, please talk to the Superintendent or Grounds Foreman.

1. Visitors are welcome to place flowers at the gravesite of loved ones. Please place flowers in the ground (not in the concrete border) flush with the ground and within one inch minimum from the marker. If you wish to place flowers in a different location or use metal stakes to secure them, please confer with the Superintendent for permission.
2. Flowers may be placed only in Cemetery approved flower vases, or if not available, in unbreakable containers (no ceramic or glass, for safety reasons) placed at the head of the grave. Containers must not exceed one gallon in size. Cemetery staff may remove temporary vases, if deemed to be a hazard.
3. For the purpose of mosquito control, mosquito gel is required in all permanent and temporary vases. The Cemetery staff will provide mosquito gel at no cost. To control the mosquito population, the Cemetery staff will remove any vase or container containing water that does not contain the mosquito gel.
4. Please do not place anything besides water and mosquito gel in flower vases. Items such as sand, gravel, rocks, cement, casting plaster or metal pose a safety hazard. Cemetery staff will remove vases that contain more than water and mosquito gel.
5. Please request permission from the Superintendent to place items such as statues, toys, boxes, shells, and breakable objects on the grave stone. The District reserves the right to remove items that it deems as unsafe. Pebbles honoring a faith tradition are acceptable when placed on the top of a grave stone.
6. Please respect flowers and growing plants on any plot for which you do not hold burial rights. Ensure that children do not climb on monuments and are supervised by an adult when visiting the Cemetery.
7. Please discard dead flowers, old mosquito gel, and other rubbish in containers provided for that purpose. See office staff or a member of the grounds crew for replacement gel.
8. The Cemetery staff will remove holiday decorations thirty days after the holiday has passed. The staff will also remove dead or faded flowers, as they deem necessary.

9. The Cemetery staff may trim trees, shrubs, plants, or vines that, in its opinion, is unsightly or unsafe to adjacent plots, paths, streets, or Cemetery grounds.
10. Please contact the Superintendent if you wish to burn incense on the Cemetery grounds. No combustible materials can be left anywhere on the Cemetery grounds.
11. The Monument Regulations Table establishes allowable physical dimensions for memorial markers. All markers must be a minimum of 3 inches thick or set into a 5 inch thick concrete foundation. Memorial markers can be made of granite, marble, or US standard bronze. The Superintendent must approve any other materials. The burial rights holder may appeal to the Board if he or she disagrees with the Superintendent's decision.
12. Only bond-insured companies or individuals can set markers. The maximum number of markers per casket plot is two (2).
13. The Superintendent determines the thickness of the cement foundation.
14. Memorial Markers Only (MMO) must bear an inscription that the grave site does not contain interred human remains.
15. The Board of Trustees reserves the right to the following:
 - To stop the placement of a grave stone that in its view contains inappropriate language, symbols or pictures
 - To make improvements to the landscaping of the Cemetery grounds
 - To decide all aspects of marker and monument setting, including location, position, orientation, concrete borders, and flower vases
16. The District is not liable for 3rd party damage, theft, vandalism or deterioration of markers.
